

Personal Statement

The following statement will provide the description of my recent professional achievements and identify personal growth. Besides, I will explain my career goals and how the Graduate Privilege Partners Program can be helpful in accomplishing them.

I have made a decision to build my career in hospitality, because the spirit of hotels and resorts fascinates me. New day – new challenges, new people, new experience; it is always different, unpredictable and exciting. I believe that, as a genuinely service-orientated person, I will perfectly fit this industry and achieve considerable results.

In my opinion, the start is an imperative part of any initiative. Thanks to my family, I had the opportunity to begin my journey with a quality first step - education. After analyzing the last 1.5 years of my studying progress in Blue Mountains International Hotel Management School, I concluded that I had achieved greatly in personal and professional development.

First of all, I became confident in myself and stress resistant. My interpersonal and communication skills have been significantly improved. Moreover, I prioritized such values as honesty and respect in my life, because without them any kind of relationship cannot be built.

Secondly, I definitely developed skills, relevant to hospitality. I successfully completed my first internship. It was a valuable opportunity to gain experience in the industry from the business operations points of view. Moreover, I learnt how to go an extra mile for a customer as well as how to handle complaints. Recognition from the manager and positive reviews from the guests I served motivated me to work in the industry with even more enthusiasm. That is why I applied and had an honor to be approved in participating in Mentoring Scholarship Program, where I can share my knowledge with other students, take responsibilities and practice my leadership skills.

I have a set of short- and long-term goals. I would like the GPP Program to be the second step in my career. During my second placement, I plan to establish connections, build myself as a competent professional and bring value to the company. If my experience is successful, I will commit to the brand and will be happy to contribute to the success of the business.

I have an ambitious career goal that I would like to achieve in my life. I would like to establish my own business with an aim of improving and developing tourism in Siberia (Russia) both for domestic and international market. In this way, I could positively influence Russian economy and show my country from the different perspective for guests from overseas. It is a very complicated goal to achieve, but I have already started my journey towards it and I believe that nothing is impossible.
